

# Newsline ~ Atlantic Geese

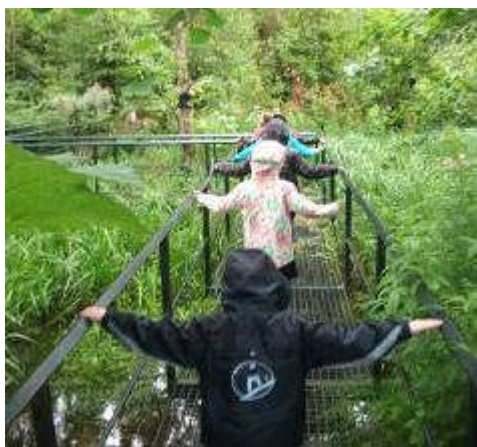

Summer 2011

## Planting a Seed

In Science we have been learning about planting. We had great fun digging in the soil! We all planted our own sunflower seed and watched it grow and grow. We can all label the parts of a plant and know that plants need water to grow. Atlantic Geese soon to be known as the 'Gardening Geese'!

**Digging and Planting!**

**Hold on tight!**

## Sculpture Park

We went on a fantastic trip to a Sculpture Park, which was in a forest! We walked and ran down lots of paths and bridges to find sculptures in every direction we looked. They were hidden in the water and hidden in the trees. We were able to touch them and some were so big we could climb them.

## Following Instructions

In Literacy we have been following instructions. We had to follow step by step instructions to make fairy cakes. They were yummy! We learnt how to measure ingredients, mix them together and crack eggs.

**Mixing Together!**

**Crack That Egg!**
