

Summer 2011

D.T. Designing a breakfast

In Design and Technology this term we have designed and evaluated a range of breakfast foods. In this activity we went to the shops to buy the ingredients to design our own yoghurts. After we had made the product we got to taste and evaluate it. Then we found out which flavour was cheapest to make.

Making our yoghurt

So many things to see!

Sculpture Park

We went on a trip to a sculpture park in the middle of a forest! There were sculptures to see everywhere, sculptures to touch and even sculptures to sit on when we got tired! We walked miles and had a really great day. When we got back we made drawings of what we had seen.

Geographical Features

In Geography this term we have been studying geographical features. As part of this work we took a trip to Seaford. We saw cliffs, a stack, and caves... but also made time to go paddling!

Come on it's not that cold!

And the sun shone!
