

Pilgrim Geese

Summer 2011

Outdoor and Adventure Week

Pilgrim Geese had a fantastic time. In the evening, some of the children and adults went canoeing on the Aquadrome at Rickmansworth. Here we are paddling into the sunset...

Don't rock the boat!!!

"We'll need a switch so we can turn the power on and off"

Science Making Electrical Circuits

One of our favourite things to learn about this term was how to make an electric circuit. Here are some of us working as a team to figure out how we might draw a circuit we have made.

**One potato, two potato,
three potato, four...**

**...five potato, six
potato, seven potato,
more...**

We had to be really patient for these! We started working the soil of our allotment shortly after the Christmas Holiday. By March we were able to plant carrots and potatoes. But would they grow? Here we are harvesting our crop! We will use what we gathered for making soup. Yum!
