Summer 2010

Snow Geese Science Week

During Science Week the Snow Geese investigated the science of balloons and bubbles. We used pins to pop a balloon but discovered that if we stuck sticky tape on the balloon first it didn't pop. We also had a go at making giant bubbles. We enjoyed the engineering challenge and worked as a team to make a paper tower.

Our class tower even got to the finals! "It was a great way to learn about science," said Cameron.

The Snow Geese construction team build their paper tower.

Snow Geese are Bright Sparks

Brilliant Bright Sparks Concert

The Snow Geese went with some other classes from Alexandra School to a London Philharmonic Orchestra Bright Sparks concert. The Snow Geese decided they liked the drum and the violin best and especially enjoyed the performance of the Firebird song.

"We learnt the names of lots of instruments and really enjoyed it," said Sasmita.

Snow Geese at the V&A

This term the Snow Geese visited the V&A museum in London. We were looking at the objects made from glass to help us with our learning in Science.

"I saw some glass shoes," said Kirsty. We enjoyed the day so much that it even gave us the idea to write a story about Alfie and Annie Rose visiting the V&A museum which we performed in our assembly.

Reported by Kirsty, Adam, Nneka and Barry.

Be careful of the glass Snow Geese!

Our Shirley Hughes assembly during which we read our V&A stories.
